Magnesium is involved in 300 biochemical reactions in the body such as : muscles function, nervous system, blood sugar level and positive mood.

This mineral is also one of the most important for the synthesis of DNA and RNA. Magnesium intake is depending on age and sex.

The recommended dosage for men is from 400 to 420 mg daily and from 310 to 320mg for women.

If you don't get enough magnesium for a long period of time, a few symptoms can appear such as fatigue, anxiety, weakness and muscles cramps.
