The pleasure gesture !

Mix into a drink or sprinkle on top

IRD147

Vitamin C helps the body produce collagen, the main structural protein in skin, nails, bones, cartilage and hair, among other things*.

But as we age, its production decreases, showing the effects of ageing. This dietary supplement helps to maintain the normal quantities of collagen in the body by supporting its production.

Cocoa is known to naturally contain many nutrients with antioxidant effects. It also provides a delicious cocoa taste to add a gourmet touch!

**Vitamin C contributes to normal collagen formation and the normal function of skin*
